YOUR HOME BUILD **ADVANTAGE**

With over 20 years of successful performance, it's easy to see why the LP® SmartSide® brand is one of the fastest-growing brands of siding materials in the United States.

A PIONEER OF CHANGE

LP has redefined traditional building materials with treated engineered wood products that are designed to offer game-changing durability, beauty and workability. LP is a building industry leader in a category that's shaping the way homes, outdoor building structures, and light commercial properties are being built.

BECAUSE STRENGTH IS MAKE OR BREAK

A NATURAL DEFENSE AGAINST NATURE

All LP® SmartSide® products are treated to the core through our proprietary LP® SmartGuard® manufacturing process. With a carefully formulated mix of resins, waxes and zinc borate, the SmartGuard process adds strength and helps LP SmartSide products offer protection against hail, moisture, termites and fungal decay.

See more about how LP SmartSide products are made at [YouTube.com/LPSmartSide](https://www.youtube.com/LPSmartSide)

FOUR COMPONENTS OF PROTECTION

LP's proprietary SmartGuard manufacturing process helps ensure that every LP SmartSide Trim & Siding product is treated with an advanced formula of adhesive resins, water-resistant waxes and zinc borate, after which a water-resistant, resin-saturated overlay is bonded to the product. The result: four components of protection against water damage, termites and fungal decay.

OUTSTANDING IMPACT RESISTANCE

Testing shows that LP SmartSide products resist impact better than vinyl and fiber cement siding, which means they can stand up better against everything from everyday bumps to storm debris. And because it doesn't break as easily as fiber cement siding, LP SmartSide siding is also easier to handle and install—resulting in less waste.

HAIL AND WIND RESISTANCE

Third-party test results demonstrate that LP SmartSide lap siding resisted hail damage better than fiber cement and vinyl. In fact, the LP SmartSide warranty covers impacts from hail up to 1.75 inches in diameter. LP SmartSide lap siding is also designed to withstand tough storms with wind gusts of up to 200 miles per hour. Refer to ESR-1301 or PR-N124.

RESISTANCE TO FUNGAL DECAY AND TERMITES

Since 1996, LP SmartSide siding has undergone brutal testing in Hilo, Hawaii. An average temperature of more than 70 degrees, high levels of humidity, and almost 170 inches of annual rainfall make Hilo's climate the perfect breeding ground for termites, moisture and fungal decay. Yet our Exterior Exposure Program continues to validate that LP SmartSide siding performs over time.

BACKED BY STRONG WARRANTIES

LP has your back with an industry-leading transferable prorated limited warranty for LP SmartSide products: a 5-year 100% labor and material replacement warranty with a 50-year prorated limited warranty. LP® SmartSide® ExpertFinish® Trim & Siding products include an additional 15-year finish warranty.

ENGINEERED FOR FASTER & EASIER INSTALLATIONS

LP® SmartSide® products help you build with greater efficiency on the jobsite. From longer lengths and advanced durability to reduced waste, the math is simple—using LP SmartSide products can help boost your bottom line so you can install siding on more homes in less time.

PUTTING LP SMARTSIDE PRODUCTS TO THE TEST

With RSMMeans, a trusted third-party construction data company, we tested the productivity of LP SmartSide and LP SmartSide ExpertFinish® products against comparable fiber cement products to find out which helps you install faster, cut waste, and reduce build cycles.

THE RESULTS

Primed LP SmartSide vs. Fiber Cement

- LP SmartSide lap installed 21% faster
- LP SmartSide trim installed 47% faster
- Overall, LP SmartSide products installed 30% faster

LP SmartSide ExpertFinish vs. Prefinished Fiber Cement

- LP SmartSide ExpertFinish lap installed 30% faster
- LP SmartSide ExpertFinish trim installed 53% faster
- Overall, LP SmartSide ExpertFinish products installed 36% faster

THE BOTTOM LINE

Finish four primed LP SmartSide jobs in the time it takes to complete three fiber cement jobs (and three LP SmartSide ExpertFinish jobs in the time it takes to complete two prefinished fiber cement jobs).

THE LP SMARTSIDE DIFFERENCE

Lighter Weights:

LP SmartSide lap siding weighs 45% less than fiber cement lap siding.

Longer Lengths:

LP SmartSide siding's 16-foot lengths may lead to fewer seams and cuts, compared to fiber cement's 12-foot lengths.

Advanced Durability:

LP SmartSide siding is less prone to breakage than fiber cement, helping to reduce waste by 7%.

SMARTER SIDING FOR A MORE SUSTAINABLE WORLD

LP® SmartSide® Trim & Siding products are must-have materials to help builders qualify for green building programs. In fact, LP SmartSide products represent the only carbon negative siding option on the market, making it a great solution for clients who desire sustainable products with minimal impact on our environment.

We're not just building for the future; we're helping to protect it by using Sustainable Forestry Initiative® (SFI) certified forest management and fiber sourcing systems to help ensure that our wood comes from well-managed forests.

NATURALLY SUSTAINABLE

The LP SmartSide manufacturing process begins with wood, a renewable resource, grown and gathered responsibly under strict SFI standards. We target fast-growing trees and use 99% of the log for either the product or the fuel to make it. Plus, all binding agents and resins are low-emitting.

A DURABLE CARBON NEGATIVE SIDING OPTION

The amount of carbon dioxide emitted during production of LP SmartSide products is less than the amount the product stores over its lifetime, qualifying them as carbon negative.

In fact, LP SmartSide products emit 54% less greenhouse gases and store 10 times more carbon than fiber cement-based products.

PANEL SIDING

RATED FOR STRUCTURAL USE BY APA®

- Shiplap edges with advanced bead system for easier alignment
- Primed for exceptional paint adhesion
- Significantly lighter than comparable fiber cement panel
- Strong enough to be nailed directly to stud, making additional sheathing unnecessary in many applications
- Helps to eliminate need for additional bracing on load-bearing walls
- Ideal exterior for homes in areas of high winds or seismic activity
- Treated engineered wood strand substrate

CEDAR TEXTURE TRIM

THE CLASSIC APPEARANCE OF CEDAR

- Exterior use, including corner boards, windows and doors
- Narrow widths for more design flexibility
- Primed for exceptional paint adhesion
- 16’ length can result in faster installation and fewer seams
- Treated engineered wood strand substrate

SMOOTH FINISH TRIM

SMOOTH APPEARANCE, ADVANCED DURABILITY OF ENGINEERED WOOD

- Holds up in extreme weather, including moisture, hail, freeze/thaw cycles, and up to 200 mph wind gusts
- Treated with the SmartGuard® process for superior protectionand resistance against the weather, fungal decay and termites
- 16’ length can result in faster installation and fewer seams
- Primed for exceptional paint adhesion
- Backed by an industry-leading 5/50-year limited warranty
- Treated engineered wood strand substrate

VENTED SOFFIT

ENGINEERED TO CUT OUT PROBLEMS

- Precisely cut vents offer 10 square inches of ventilation per linear foot, making it easier to meet code requirements while adding architectural beauty
- Designed to minimize paint buildup and promote continuous airflow
- 1/8" vents to help keep hornets and bees out
- Eliminates time spent ripping full sheets
- Treated engineered wood strand substrate

BUILD BETTER WITH LP BUILDING SOLUTIONS

Building a Better World™

LP's mission is to provide an innovative and sustainable portfolio of high-quality products that help our customers build beautiful, durable homes and structures. With a united spirit of discovery, LP is forging ahead with innovative ideas to create new products that make a difference in the world.

LP WeatherLogic® Air & Water Barrier

LP WeatherLogic Air & Water Barrier provides moisture management technology for a better build. To protect against air and water during construction and for years to come, LP WeatherLogic Air & Water Barrier creates a tight building envelope, installs easily, and keeps the jobsite clean.

LP® TechShield® Radiant Barrier

The original, #1 brand of radiant barrier, LP TechShield Radiant Barrier may reduce monthly cooling costs by blocking up to 97% of the radiant heat in the panel from emitting into a home's attic, lowering attic temperatures by up to 30° F.

LP Legacy® Premium Sub-Flooring

LP Legacy Premium Sub-Flooring uses Gorilla Glue Technology® for one of the strongest, stiffest sub-floors. The resin in Gorilla Glue Technology binds wood fibers at the molecular level for premium performance.

LP® FlameBlock® Fire-Rated Sheathing

LP FlameBlock Fire-Rated Sheathing has structural design values equal to standard sheathing in the same performance category. ICC-certified (ESR-1365) per AC264 with a Class A and 30-minute Flame Spread Rating (ASTM E84), it combines fire resistance and impressive structural performance in a single panel.

LP® ArchForm™ Concrete Edge Form

LP ArchForm Concrete Edge Form is an engineered wood product designed for use in flatwork concrete forming applications, such as residential landscaping, patios, walkways, pool decks and more. It is flexible enough for curving to fit the contours of formed concrete projects and is backed by LP's industry-leading technology, service and support.
